

Outcome and Learning Objectives

Outcome: Enable those in the medical field to have a base-level knowledge of working and treating veterans (combat and non-combat) in a Health Care setting.

Learning Objectives

When you finish either the Year 1 or Year 3 program participants will be able to do the following:

- Understand the impact of being in the service from a Health Care Perspective and how to initiate that conversation (plenary/didactic session)
- Examine the unique health challenges and characteristics facing veterans and combat veterans (plenary/didactic session)
- Explore opportunities to engage veterans at their level and through their perspective by opening a dialogue regarding their service (panel discussions)
- Identify common, often under-diagnosed issues within the veteran community (plenary/didactic session)
- Evaluate the needs of a patient who is a veteran through the case-study method

**Step #1: Faculty
Training Session
2-3 Hours**

**Step #2: Didactic
Session
(30-Minutes)**

**Step #3: Small
Group Case Study
Included
(45 Minutes)**

**Step #4: Large
Group Case Study
Debrief & Next
Steps
(30-45 Minutes)**

**Step #5: Large
Group Case Study
Debrief & Next
Steps
(30-45 Minutes)**
